Here we used our **TechnoTrends** trading strategy for all trades.

1. Our all trades are **100% Intraday** Trades.
2. All trades are traded with **100% Fully Automatic Trading System**.
3. We are using and settings different parameters for different scripts here we used parameter setting for **safe traders** who don't want to trade much trades per day in this setting we will trade only **one or some times two trades per day** .
4. Here we are showing performance with **one lot per trades**.
5. We used **mcx commodity** trades for just showing our performance because in **equity** there are so many scripts we can't manage its performance and every client want to work on his/her own choice.
6. We can also use this strategy with different parameters and settings for **equity market** as well.
